Key for the list below

- Standard** - Tree with a single clear stem or trunk at least 1.7m, but can be bigger.
- ¾ Standard** - Tree with a single clear stem 1.5-1.7m from the base of the tree to the foliage.
- ½ Standard** - Tree with single clear stem or trunk 1.2-1.5m from the base of the tree to the foliage.
- Pleached** - Trees with a clear stem that have been trained to form a screen of branches and foliage on a single straight stem. They are trained onto frames of varying sizes.
- Multi-stem** - Tree grown from early age to have 2 or more main stems.
- Screen Or Espalier Screen** - Tree grown on a frame with foliage from the base of the plant to cover the frame. Used instead of hedging.
- Feathered** - Tree with single stem but the branches and foliage start from the base of the tree.
- Element** - Shrubs which are grown to form branches from the base of the stem and are often pruned into a square column.
- Topiary** - Tree that has been grown and pruned into a decorative shape.
- Ball head** - Tree that has been trained and pruned into a ball shape on a clear stem.
- Girth** - This is an industry standard measurement and is the circumference of the tree trunk measured in the main 1m up the stem.
- Height** - We use the term overall height although trees will be growing and undergo maintenance whilst in our care which will involve pruning so this height can change. Overall height is measured from the trees soil level to the top of the tree canopy and should be used as a guide.
- Spread** - A guide to the spread of the canopy of the tree and trees will undergo maintenance whilst in our care which can involve pruning so this can change.
